

Adam Cheyer

"Award-winning magician and pioneering AI inventor"

Based in Los Angeles | Mentalism

Biography

Adam Cheyer is an artificial-intelligence inventor and award-winning magician best known as a co-creator of Siri. His professional speaker biography says he has performed for heads of state and large audiences and appeared on Penn & Teller: Fool Us. He sometimes combines magic and mentalism with keynote presentations, connecting creative problem-solving with apparently impossible outcomes. Research did not establish that he currently accepts standalone public or private magic bookings, so FindMagic should present booking availability as unknown.
