

Arturo Fuenzalida

"Chilean surrealist coin and object magician"

Close-Up Magic | Stage Magic

Biography

Arturo Fuenzalida is a Chilean illusionist whose Penn & Teller: Fool Us act combines coin work, object manipulation and surreal visual ideas. A performance upload under his al_parecer brand identifies the artist, country and official Instagram handle, while the curated Fool Us ledger confirms the episode and result. The available evidence supports an active, distinctive performer profile but does not establish a standalone official website, booking route, exact home city or event-service menu. Those operational details should remain pending first-party confirmation.
