

Christopher Carter

"Chicago corporate mentalist and keynote speaker"

Based in Chicago | Comedy Magic | Corporate Events | Mentalism

Biography

Corporate mentalist and keynote speaker Christopher Carter blends psychology, body language and storytelling into presentations that, in his words, feel like a show and teach like a masterclass. The approach grows out of doctoral work in theater at the University of Michigan, where he studied theatrical movement - how posture, gesture and presence communicate meaning before a single word is spoken - and out of decades on stage since he moved to Chicago in 1990 to launch his career as a mentalist.

Audiences meet interactive demonstrations that appear to be mind reading, alongside clear takeaways on projecting confidence, reading others more accurately and spotting the signals that shape trust and decision making. Carter has performed in over thirty countries on five continents, and works across sales conferences, keynotes, workshops and evening event entertainment.
