

Ferny Garcia

"Interactive magician"

Biography

Ferny Garcia performs magic built around the people watching it. His shows are less a performance to observe than an interactive experience, with the audience drawn in and smiling as they witness the impossible happening right before their eyes.

The astonishment comes fast and the smiles last, which is what drew him from a young age to the art of illusion and the wonder it brings to people's lives. Away from performing, Ferny works as an Assistive Technology Coordinator in Special Education, plays the ukulele and goes kayaking with his wife and two dogs. That warmth carries into the room, making his participatory style a natural fit for parties, celebrations and family occasions of every kind.
