

Gabriel Gascón

"Chilean innovation in intimate visual sponge-ball magic"

Close-Up Magic | Parlour Magic

Biography

Gabriel Gascón is a Chilean close-up magician, creator and lecturer whose highly visual work with sponge balls has earned international recognition. Specialist material records a FISM Latin American invention award, Chilean Magician of the Year honors and his distinction as the first Latin American performer to win a Fool Us trophy. Current ticketing confirms his 2026 one-man show Cotidiano, an intimate program that transforms ordinary objects into emotionally charged impossibilities. His official Instagram is identified by an established magic organization, but research did not find a standalone performer website or direct booking contact.
