

Giancarlo Scalia

"Refined Italian card magic powered by pure sleight of hand"

Close-Up Magic

Biography

Giancarlo Scalia is an Italian close-up magician and teacher specializing in technically refined card magic. A current magic-academy profile documents his professional development and teaching role, while his performer-published 2025 Fool Us video presents a classic card plot executed entirely through sleight of hand and records his successful trophy performance. The evidence supports an active artist and instructor with a public educational presence. Research did not find a dependable standalone performer website, direct booking contact, general event-service offer or verified current home city, so those operational fields should remain open.
