

Kelvin Chow

"Hong Kong card invention preserved through television and creator releases"

Close-Up Magic

Biography

Kelvin Chow is a Hong Kong card magician and magic creator whose visual methods have been published for other performers. Current retailer listings preserve products including Alter and Quiver and describe his earlier appearance on China's CCTV Spring Festival broadcast, while his Fool Us routine demonstrated precise, direct card technique. Research did not find a performer-controlled website, reliable recent public performance, current home city, direct booking contact or evidence that Chow accepts general event engagements. This profile should therefore document a real and influential creator without presenting him as currently bookable.
