

Mario López

"Andalusian micro-magic where cigarettes, accidents and character become miracles"

Close-Up Magic

Biography

Mario López is a Spanish close-up and micro-magic specialist from Jaén whose relaxed character presents magic as something that happens around his virtues, flaws and everyday mishaps. A 2025 municipal awards program confirms current professional recognition and records major international results in London, European FISM and world competition. López is especially associated with original cigarette manipulation and won a Fool Us trophy with a deceptively casual routine. Research did not locate a dependable performer-controlled website, direct booking contact, current home city or current public calendar, so FindMagic should not advertise general availability.
