

Mr Triton

"French visual comedy built from ordinary objects behaving badly"

Close-Up Magic | Stage Magic

Biography

Mr Triton is a French magician whose Fool Us routine transformed an ordinary mug, rope and comic stage problem into an escalating visual sequence. His performer-uploaded video thanks collaborators in the French close-up magic community and states that the act and additional material are available for booking. That supports current professional intent and a French base country, but the research did not locate a stable performer-owned website, precise home city, direct business email or public schedule. FindMagic should link the verified performance and describe the visual specialty while keeping richer booking details unresolved.

Booking, profile, and official links

Available for Close-Up Magic, Stage Magic, private engagements, and custom events.
