

Open zone

"Digital magic studio for corporate events"

Based in Paris | Corporate Events

Biography

Open zone is the creative studio of digital magic shows dedicated to events in France, working since 2008 to build magical interventions that blend the real and the virtual around a client's brands, projects and communication needs.

Its magicians are specialists in digital magic, and the scale flexes to the room: iPad magic moving between guests at an evening reception, holograms, or a grand product launch performed on stage. The effects play with the senses so that emotion, and the message behind it, lands with the audience. Team building days, company parties, conventions and corporate evenings are the natural home for this work, with best-selling formats ready for business events.
