

Sydney Weaver

"Speedcubing transforms into visual magic and mathematical play"

Stage Magic

Biography

Sydney Weaver is a professional speedcuber and mathematics educator who uses Rubik's Cubes to make complex ideas approachable. Her performer-controlled site identifies nine gold medals and presents her Fool Us appearance, where elite cube skill became the foundation for a card-and-cube magic routine. Other educational programs have taken her to festivals, conferences and universities, but current research did not find a clear general entertainment-booking offer. The site also does not establish a current home city, direct professional email or reliably dated public schedule. FindMagic should present her verified specialty without assuming ordinary magician-for-hire availability.
