

The ParaMentalist

"Paramentalism and metal bending built from original working methods"

Close-Up Magic | Mentalism

Biography

Menny Lindenfeld performs and publishes as The ParaMentalist, specializing in mentalism, visual metal bending and original close-up methods. A substantial current creator catalogue includes lectures, full acts and practical releases for working magicians, confirming continuing activity in the craft. Industry material also describes long experience entertaining private and business audiences in English, German and Hebrew. Research did not locate a dependable performer-controlled website, current home base, public calendar or direct booking contact, so FindMagic should publish a factual non-bookable profile until those details can be verified.
