

The Van Hargen Twins

"Twin telepathy accelerated into a playful television sprint"

Mentalism

Biography

The Van Hargen Twins are British sisters Poppy and Sasha Van Hargen, a two-person telepathy act created with magician and consultant Martin T. Hart in 2021. Their Telepathic Olympics routine won a Fool Us trophy and the Magic Circle's 2022 Rising Star Award, using genuine twin chemistry, music backgrounds and lightning-fast communication as its theatrical frame. Hart's current site preserves the act and credits, but research did not find a distinct performer-owned duo site, public calendar or booking route confirming continuing availability. Their profile should retain the verified joint credit without promising regular bookings.
