

Theron Christensen

"Classic magic presented through an enthusiast's historical lens"

Stage Magic

Biography

Theron Christensen is an American magician whose Fool Us appearance presented classic effects through a strong interest in magic history. A regional International Brotherhood of Magicians newsletter later described him as a recent contestant and highlighted his historically informed presentation of established material. The verified television record is enough to establish a real profile, but current research did not locate a performer-owned website, recent professional schedule, booking contact, precise home base or clear evidence that Christensen currently works as an event magician. The listing should remain non-bookable until those details can be confirmed.
