

Wayne Hoffman

"Mind reading and illusion engineered for high-energy modern audiences"

Based in Naples | Mentalism | Stage Magic

Biography

Wayne Hoffman is an American mentalist, illusionist and speaker whose high-energy programs blend psychology, prediction and visual magic. His performer-controlled site presents professional entertainment and speaking for live events, while a substantial television history includes a trophy-winning Fool Us appearance. Hoffman's work often frames apparent mind reading as an exploration of attention, decisions and human potential rather than a supernatural claim. Research supports continuing national and international bookings through his official presence, but did not establish one exact current home city, a direct public email or a reliably indexed public performance calendar.
